Work Experience

August 2010 – Present

Self Employed

For the past year I have mainly been working for two companies simultaneously; Masters of Creation - a web design company and Chingford Computer Services – a general computer services company that provide a repair service for computers and mobile phones, as well as running an ebay shop. For Masters of Creation we have a diverse range on clients and projects. We build a variety of websites from simple static webpages to dynamic websites. We have also built a Mobile phone application for a client that is for both iOS and Android. For Chingford Computer Services I assist with the repairs and also help manage the employees that run the ebay shop. I also offer a production and mix/master services from my home studio.

June 2008 – Dec 2008, August 2003 and August 2004, August 2005, August 2006, December 2006 and August 2007

Embee Jewellery

Raymond Mumford. Embee Jewellery Ltd. Hatton Garden. EC 1

Office junior: my duties at the jewellery manufacturing company were wide ranging including dealing with customers enquiries and requests on the telephone and in person; this meant I dealt with a wide range of people whose roles ranged from company directors to manufacturers. I had responsibility for the packing and delivering of jewellery to customers and out-workers. I dealt with the mail, filing and the delivery of messages, and assisted with the invoicing and production and delivery end of month statements.

2005: Helen Briner (Head of Music Department)

Warren Comprehensive School, Whalebone Lane North, Chadwell Heath, Romford.

I undertook a period of voluntary work experience working in a purpose built recording studio running Cubase with an Analogue 24 Channel Mackie mixing desk. I worked with a Sound Engineer, performing various tasks including the recording of pupils' projects, repairing keyboards, guitars and a range of other instruments. I assisted in the school concert rigging the stage for sound and light and worked with the producing the sound for the concert.

2002 : Work placement at Trinity Catholic School

As part of the Sixth form contract, sixth form students completed a year of community work. I worked in reprographics. I gained experience of photocopying, collating, organising and prioritising work. I was trained to use the laminating and binding machines.

2001: Woodford Aquatics

I completed a two weeks work experience in year 10 at the aquatic shop. Duties involved cleaning, feeding and caring for the various livestock. I was responsible for: observing the general health of the stock, dealing with customer enquiries and serving customers. The experience was particularly useful and interesting, it added to my knowledge of aquatic creatures; I keep a tropical tank at home and keep Koi carp and various other cold water fish. Working with the general public, answering queries and serving the customers enabled me to develop my communication and approach to problem solving skills.

Interests

I enjoy a wide range of music, music production, DJing. I play football and enjoy keeping fit. I also enjoy building websites and mobile phone applications.
